Summary

Front-End Developer with hands-on experience building responsive web applications using HTML, CSS, JavaScript, React, PHP, and MySQL. Led the development of college and community portals with features like admin panels, CRUD functionality, and user authentication. Focused on writing maintainable code and creating accessible, user-friendly interfaces. Regularly explore and apply current web development practices and tools.

Education

Diploma in Computer Science&EngineeringGovernment Polytechnic MahobaAug/2022 – July/2025\|Percentage – 69.59%

Technical Skills

- **Web Technologies: HTML5, CSS3, JavaScript, ReactJS**
- **Backend Technologies: PHP, MySQL, Express JS, NodeJS**
- **Programming Languages: C, Java, Python**
- **Version Control: Git&GitHub**
- **Web Development: Responsive Web Design, CRUD Operations**

Projects

College Website Portal

- Spearheaded the development and launch of a responsive college portal for 1,500+ students/faculty, delivering real-time notices and event updates, resulting in a 60% decrease in student inquiries to admin offices.
- Designed and implemented an easy-to-use control panel to manage notices, events, gallery uploads, and enquiry forms, improving administrative efficiency by 40%.
- **Tech Stack: HTML, CSS, JavaScript, PHP, MySQL**
- **Frontend GitHub: College Website Portal**
- **GitHub Admin: Admin Panel**

QR-Based Digital Menu Card

- Engineered a QR code menu system facilitating real-time updates and categorization for over 200 menu items, which minimized customer wait times by 25% and optimized ordering efficiency.
- Developed and integrated a secure, user-friendly admin dashboard enabling real-time menu updates, manually pricing adjustments, and instant item availability management — reducing manual effort by 50% and improving operational efficiency.
- Enabled digital ordering and checkout, reducing average order wait time by 30% and minimizing staff workload.

- Optimized complex database queries and backend processes, reducing page load times by 40% and maintaining seamless performance during peak user traffic.
- **Tech Stack: HTML, CSS, JavaScript, PHP, MySQL**
- **GitHub: Digital Menu Card**

Coding Community Portal

- Conducted a coding portal with 100+ programming questions, 50+ user-submitted answers, and 20 categorized tutorials.
- Created a robust authentication system with role-based access, protecting user data and ensuring secure, streamlined content management for up to 5 admin roles.
- Enabled user registration for 50+ active members within the first month, encouraging knowledge sharing and collaboration.
- Built a simple dashboard for managing things for content moderation and user management, ensuring a healthy learning environment.
- **Tech Stack: PHP, MySQL, HTML, CSS, JavaScript**
- **GitHub: Coding Community Portal**

Volunteer Experience

Web Developer (Project-Based) | Remote | May 2024 - Present

- Led the end-to-end development of full-stack PHP applications — including a digital menu system and a coding Q&A portal — boosting user engagement and streamlining online workflows for 500+ users.
- Designed and coded fully responsive user interfaces and secure, intuitive admin panels, improving usability and reducing admin effort by 40%.
- Managed version control and collaborative development on GitHub; deployed and maintained live demos to showcase working solutions to stakeholders.
- Resolved 30+ bugs and issues through systematic testing and debugging.

Additional Information

- **Languages: Fluent in English and Hindi**
- **Interests: Building innovative web apps, solving algorithmic challenges, exploring emerging web frameworks.**
- **Portfolio: GitHub**
